

SIMPLIFIED PHASE 1 PROPOSAL

LipiCore Policy Assistant

Advanced Policy Retrieval and Internal Chat for Sanima Bank

Prepared for	Sanima Bank Limited
Prepared by	Lipi One Pvt. Ltd.
Website	www.lipi.one
Infrastructure	Silver Lining Pvt. Ltd.

Product	LipiCore Policy Assistant
Model layer	LipiLLM
Offer	Policy retrieval + internal chat
Monthly price	NPR 250,000 + VAT

Simple onboarding package

This proposal keeps Phase 1 focused on the practical starting point: approved-document policy retrieval with strong RAG citations, plus internal staff chat. Advanced enterprise modules are listed only as future upgrades.

At a Glance

Phase 1 focus	Advanced policy retrieval and internal staff chat
Monthly price	NPR 250,000 per month + VAT
Access	Windows and macOS desktop software connected to managed hosted environment
Included RAG	Natural English/Nepali questions, hybrid retrieval, source passages, page/heading/clause references where available
Included chat	Direct messages, department channels, groups, announcements, file/image sharing subject to policy
Future upgrades	OCR-heavy workflows, compliance automation, integrations, long-document analytics, advanced reports

Prepared by Lipi One Pvt. Ltd. | Proposal date: June 5, 2026 | Data is not used to train public AI models or fine-tune LipiLLM unless separately approved in writing.

1. Proposal Summary

Lipi One proposes a simple Phase 1 rollout of **LipiCore Policy Assistant** for Sanima Bank.

The goal is to help Sanima Bank staff quickly find trusted answers from approved internal policies, SOPs, circulars, manuals, and procedures. Phase 1 also includes our internal staff chat system so teams can coordinate within the same secured environment.

This is intentionally not a large enterprise AI rollout. It is a focused onboarding package: policy retrieval first, internal chat first, and future upgrades only after Sanima Bank sees practical value.

Phase 1 price: NPR 250,000 per month + VAT.

2. What Sanima Bank Gets

Area	Included in Phase 1
Policy questions	Staff can ask natural questions in English or Nepali.
Approved knowledge	Answers are generated from approved bank documents only.
RAG retrieval	Semantic search, keyword search, hybrid retrieval, and reranking.
Source evidence	Answers show source passages and document references.
Page and clause references	PDF page, printed page, heading, clause, section, or paragraph shown where available.
Trust behavior	If the answer is not found in approved documents, the system says so instead of guessing.
Staff assistance	Light summaries and small internal email/reply drafts based on approved documents.
Internal chat	Direct messages, department channels, groups, announcements, and file/image sharing subject to policy.
Desktop app	Windows and macOS software connected to the approved hosted LipiCore environment.
Admin controls	User roles, department access, document approval, audit logs, and basic usage visibility.

3. How It Helps the Bank

- Reduces time spent searching for policies, SOPs, and circulars.
- Helps staff locate the correct document and source faster.
- Gives source-backed answers with page and clause references where available.
- Reduces dependency on senior staff for routine policy lookup.
- Keeps official interpretation and final decisions with authorized bank staff.
- Gives Sanima Bank a low-risk starting point for enterprise AI adoption.
- Adds internal staff chat without requiring a separate communication tool.

4. Commercial Offer

Item	Price
LipiCore Policy Assistant + Internal Chat	NPR 250,000 per month + VAT

Included in the monthly package:

Hosted server access, LipiCore software, LipiLLM policy retrieval, approved repository, source citations, internal chat, Windows/macOS desktop access, admin controls, audit logs, and standard support.

Setup and onboarding are included for the agreed initial scope: up to **10 GB of documents or 1,000 files**, whichever comes first.

Commercial notes:

- Price is exclusive of withholding, applicable taxes, bank charges, and government duties. VAT is added separately as stated above.
- Suggested minimum contract term: 12 months.
- Additional storage, if required, is **NPR 10,000 per TB per month**.

5. Implementation Plan

Estimated timeline: **4 weeks** after purchase order and required Sanima Bank inputs.

Week	Work
Week 1	Kickoff, hosted setup, document categories, access roles
Week 2	Repository setup, admin setup, user roles, internal chat setup
Week 3	Initial document onboarding, policy retrieval testing, source/citation checks
Week 4	User orientation, UAT support, final configuration, go-live

Sanima Bank will provide the first batch of policies, SOPs, circulars, and user/role information.

6. Not Included in Phase 1

To keep the first rollout simple and affordable, Phase 1 does not include:

Not Included Now	Reason
Full enterprise analytics model	Keep Phase 1 focused on policy retrieval.
Heavy OCR or bulk scanned archive processing	Can be scoped later after document review.
Core banking, DMS, SharePoint, email, or intranet integration	Avoid integration complexity in first rollout.
Automated compliance monitoring or custom reporting	Future module after policy retrieval adoption.
Department-specific AI agents or API integrations	Future expansion only if Sanima Bank requests it.
Automatic credit, risk, legal, regulatory, or customer decisions	Final decisions remain with authorized bank staff.
Fine-tuning LipiLLM on Sanima Bank data	Not included unless separately approved in writing.

7. Future Upgrade Path

After Sanima Bank uses Phase 1, future upgrades can be discussed separately:

OCR/scanned document intelligence, long-document analysis, compliance circular impact workspace, policy comparison, executive reporting, department-specific assistants, system integrations, and advanced analytics can be discussed later.

No future upgrade is required for Phase 1.

8. Next Steps

1. Sanima Bank reviews this short Phase 1 offer.
2. Sanima Bank confirms initial departments, users, and document types.
3. Lipi One and Silver Lining confirm hosted environment requirements.
4. Sanima Bank shares the first batch of policy, SOP, and circular documents.
5. Agreement or purchase order is issued.
6. Phase 1 implementation begins.

Lipi One looks forward to helping Sanima Bank start with a simple, secure, and practical policy retrieval platform.
